

# STS-064 MOTORCYCLE ANTI-THEFT BURGLAR ALARM LOOSE ELECTRONIC DIY KIT

## Introduction:

STS-064 motorcycle anti-theft burglar alarm loose electronic diy kit is a perfect compatibility, suitability for installation locations, and ease of installation are all guaranteed by precise incisions and interfaces. The product uses high-quality materials that resist corrosion and wear well and are long-lasting. Professional chip sets deliver outstanding system performance. Long service life, anti-aging, and simple operation. When moving the motorcycle or starting it without the key, the motorcycle anti-theft alarm circuit built with the CC4081 will emit a loud alarm sound to draw attention.
