#### **Dimensions & Pin-out**

Label	Description
DATA	The Data pin of the transmitter
VCC	The power supply of the transmitter.
GND	The hole to solder and connect antenna length.
ANT	The hole to solder and connect antenna.

### **IMPORTANT NOTES**

- 1) **Antenna:** Use any soft/hard wire with the specified length. If a telescopic antenna is used, be sure that it is fully extended. Length of antenna is important and frequency dependent (refer to the specs section above for the correct length).
- 2) If the transmitter module is housed in a metal casing, an external antenna should be used. For best result, use a 50  $\Omega$  coaxial cable for connecting the antenna to the module.
